Depression is **not** a normal part of aging.

Before you say, “Oh, I’m just fine….”

Ask yourself if you feel:

- nervous or empty
- guilty or worthless
- tired and slowed down
- you don’t enjoy things the way you used to
- restless or irritable
- like no one loves you
- like life is not worth living

Or if you are:

- sleeping more or less than usual
- eating more or less than usual
- having persistent headaches, stomach aches or chronic pain

These may be symptoms of depression. Share with you doctor how you are **really** feeling. Depression is a treatable medical condition.
