

Redstone Park restroom renovations begin

Construction has begun to replace the restrooms at Redstone Park, 3280 Redstone Park Circle. Seven restrooms in three separate buildings will be renovated, and the work is expected to take 3-4 months.

One building will be renovated at a time beginning with the Lebsack Tennis Center restrooms, followed by the Creekside restrooms near the playground and the Sandstone restrooms near the ball fields. Temporary restrooms will be available.

All of the restrooms will receive new fixtures compliant with the federal Americans with Disabilities Act and new flooring. In addition, a new bottle filler water fountain will be installed at the tennis center. The current restrooms are 18 years old, and many of the old fixtures and parts are no longer available.

Project updates will be posted to highlandsranch.org. For more information, please contact Construction and Facilities Maintenance Manager Ken Standen at 720-240-5913 or kstanden@highlandsranch.org.
